EVOLVING ROLE OF VALUATION

*The valuation profession will only grow in importance. New challenges and opportunities to enhance business and financial markets, and society at large, will confront valuers at a greater rate. Macro trends including climate change; a shift in the way we use and manage natural resources; population demographics; the proliferation of financial instruments; and the role of technology in business will shape, and be shaped by, the valuation profession. Asset values will evolve as these forces influence our day-to-day lives, and **the importance of transparent and reliable valuations, including on balance sheets, will only become more important in our interconnected world.***

Sir David Tweedie,

Chairman, International Valuation Standards Council

Who does not need valuation today?

Whether you are working for value creation, value capturing, value distribution or tax collection, all are affected by valuation – be it courts, quasi-judicial authorities, governments, regulators, bankers, auditors, lawyers, investors and other stakeholders. Credible valuations are important in supporting economic activity, strengthening financial markets and protecting the public interest.

For any market economy, valuation of assets is crucial to various business areas, from transactions and financing to litigation, strategic management and compliance. Stakeholders and regulators are demanding greater transparency through fair value reporting. Global Financial Crisis revealed deep fault lines and taught many important lessons, one of those being that valuation really does matter! With accounting moving more and more towards value, there is need for competent and professional valuation experts globally.

COURSE DESIGN

INDIAN INSTITUTE OF CORPORATE AFFAIRS

The Indian Institute of Corporate Affairs (IICA), an autonomous institute, works under the aegis of the Ministry of Corporate Affairs to deliver opportunities for research, education, and advocacy. It is a think tank that curates a repository of data and knowledge for policy makers, regulators as well as other stakeholders working in the domain of Corporate Affairs. Key activities carried out by IICA include induction and in-service training to Indian Corporate Law Service (ICLS) officers, executive education, capacity building and training programmes, policy advisory functions, public outreach and stakeholder consultants through seminars, conference and forums.

ABOUT SCHOOL OF FINANCE

School of Finance, IICA is engaged in capacity building, education, research and consultancy in financial and regulatory issues relevant to corporate sector, professionals and investing public at large. The School conducts short-term Training Programmes and workshops on banking, finance, accounting, auditing, valuation, risk management, IFRS, regulation of corporate financial disclosures and other emerging issues in finance and accounting. It also provides research, advocacy & advisory support to priority initiative of Government of India like Financial Inclusion, Financial Literacy and Financial Reporting.

WHO CAN BENEFIT FROM THE COURSE

Finance professionals, consultants, senior officials of government and regulatory bodies, banking and insurance professionals, CA, CS, ICWA, lawyers, finance and economics faculty members, financial / business analysts, investors, board members, auditors, corporate and investment bankers, fund managers, investment analysts, CMD, CEO, CFO, Director, GM, Finance heads and other professionals who want to develop valuation acumen.
